

JETTA 450

Food-Machinery Chain Lubricant · NSF H1

DESCRIPTION

NSF H1 registered fully synthetic oil designed to lubricate the chains of low temperature freezing tunnels, also suitable for hydraulic systems, vacuum pumps, compressors and general machinery lubrication used in the food service industry.

FEATURES

- Formulated to meet or exceed performance of comparable OEM fill products
- Low-foaming lubricant
- Separates readily from water and offers superior protection against wear, rust and corrosion, and deposits

PACK SIZES

Multiple pack sizes available on request.

APPLICATIONS

- Low temperature freezing tunnel chains
- Hydraulic systems
- Vacuum pumps
- Compressors
- General machinery lubrication in food service industry
