

FOLSIL HIGH TEMPERATURE HIGH LOAD

PTFE Grease · High Temperature / High Load

DESCRIPTION

A high-temperature grease engineered for extreme conditions, featuring PTFE with additives for wear and corrosion protection.

PACK SIZES

Multiple pack sizes available on request.

FEATURES

- PTFE composition for anti-wear properties
- Antioxidants and anti-corrosion additives
- Chemical resistance to aliphatic hydrocarbons, crude oil, natural gas, LPG, diesel, dilute acids, bases, water, and aqueous solutions
- Low evaporation at elevated temperatures
- Excellent sealing capabilities
- Non-toxic formula
- Reduced carbon residue formation
- Enhanced load-carrying capacity
- Thermal and mechanical stability
- Extended lubrication intervals and cost-saving advantages through durability

APPLICATIONS

- Plain and anti-friction bearings
- Sliding surfaces
- Industrial baking ovens
- Paper and cardboard production
- Autoclaves
- O-ring and rubber gasket sealing

PRODUCT CHARACTERISTICS

Detailed typical values are available on request from our technical department.

Typical values shown do not constitute a specification. The information is based on current knowledge and is intended to describe the product for possible applications; it does not release the user from performing preliminary tests.
