

JEFROST 68

Refrigeration Compressor Oil · ISO VG 68

DESCRIPTION

A hydrotreated naphthenic ISO VG 68 base oil formulated for refrigeration applications. The product exhibits very low pour point, good cold flowing and high thermal and chemical stability.

FEATURES

- Naphthenic base oil composition with high solvent power
- Superior low-temperature properties
- Favorable floc points for refrigerant-oil mixtures
- Very low pour point and good cold flowing
- High thermal and chemical stability

PACK SIZES

Multiple pack sizes available on request.

APPLICATIONS

- Refrigeration systems using hydrocarbon refrigerants
- Refrigeration systems using ammonia
- Refrigeration systems using CFC refrigerants

PRODUCT CHARACTERISTICS

PROPERTY	TYPICAL VALUE
ISO Viscosity Grade	VG 68
Viscosity at 40°C	68 cSt
Base Oil Type	Hydrotreated naphthenic
API Classification	Group V

Typical values shown do not constitute a specification. The information is based on current knowledge and is intended to describe the product for possible applications; it does not release the user from performing preliminary tests.
