

JECLEAN CLP

Weapon Cleaner · Lubricant · Protectant

DESCRIPTION

A multifunctional cleaner, lubricant, and preservative formulated for weapons and weapon systems. Delivers exceptional penetration, effectively guarding against dust and particulate infiltration, and provides robust rust inhibition to minimize jamming risks across handheld and large-caliber platforms.

FEATURES

- Excellent penetrating capabilities
- Dust and particulate protection
- Superior rust inhibition properties
- Prevents weapon jamming in adverse conditions
- Works for both handheld and large-caliber systems
- Contains no ozone-depleting compounds
- Complies with California Clean Air Act VOC requirements

PACK SIZES

Multiple pack sizes available on request.

APPLICATIONS

- Military weapon maintenance
- Civilian weapon maintenance
- General weapon system preservation

PRODUCT CHARACTERISTICS

PROPERTY	TYPICAL VALUE
Operating temperature range	-65°F to +150°F (all climate conditions)
Specification / approval	MIL-PRF-63460F

Typical values shown do not constitute a specification. The information is based on current knowledge and is intended to describe the product for possible applications; it does not release the user from performing preliminary tests.
