

LUBRIFUL 25017

Fuel Lubricity Additive

DESCRIPTION

A corrosion inhibitor and lubricity additive formulated for concentrated jet fuel, diesel, gasoline, heating oil, and kerosene. The additive ensures the quality of finished petroleum products while safeguarding fuel system infrastructure.

FEATURES

- Inhibits corrosion in equipment to extend operational lifespan
- Protects fuel storage tanks from rust and degradation
- Enhances pipeline protection against corrosive elements, reducing maintenance expenses
- Improves fuel lubricity for smoother engine operation
- Reduces wear on critical engine components

PACK SIZES

Multiple pack sizes available on request.

APPLICATIONS

- Concentrated jet fuel
- Diesel
- Gasoline
- Heating oil
- Kerosene
- Fuel storage tanks
- Pipelines
- Fuel systems

PRODUCT CHARACTERISTICS

PROPERTY	TYPICAL VALUE
Specification / approval	MIL-PRF-25017H
Specification / approval	NATO S-1747

Typical values shown do not constitute a specification. The information is based on current knowledge and is intended to describe the product for possible applications; it does not release the user from performing preliminary tests.
