

# HIGH TEMP NON-MELT 47

Non-Melt High-Temperature Grease

## DESCRIPTION

Premium adhesive non-melting grease (JETTA 47) formulated for high-performance applications, particularly suited for plain and anti-friction bearings operating under elevated temperatures and heavy loads.

## FEATURES

- High viscosity base oil construction
- Superior mechanical stability with heat exposure
- High dropping point exceeding 260°C
- Resistance to centrifugal separation in rotating machinery
- Water resistance with excellent resistance to water washout and spray-off
- Alkaline resistance for challenging environments
- Good pumpability for easy application across various systems

## PACK SIZES

Multiple pack sizes available on request.

## APPLICATIONS

- Plain and anti-friction bearings
- High-temperature rotating machinery
- Manufacturing systems
- Automotive applications
- Industrial equipment

## PRODUCT CHARACTERISTICS

| PROPERTY       | TYPICAL VALUE |
|----------------|---------------|
| Dropping Point | Exceeds 260°C |

Typical values shown do not constitute a specification. The information is based on current knowledge and is intended to describe the product for possible applications; it does not release the user from performing preliminary tests.
